

## **GNOSIS Space Weather**

### **Virtual Sandbox**

The GNOSIS network will shortly be hosting a virtual sandbox meeting on space weather, following on from the workshop held at Leicester in December 2019.

#### Meeting Details

Date: Thursday 2 April

Time: 10:00 – 15:00

Zoom Meeting ID: **455-495-0849** (download software [here](#) if needed).

It is also possible to call in using the UK phone number: **020 3695 0088** (enter the Zoom ID above, followed by the # key – if asked about participant ID just hit # again). When connected, please mute your audio and use the ‘raised hand’ functionality (hand next to your name in ‘Participants’ menu) to ask questions.

#### Agenda

**10:00-11:00** Joint industry / academia research proposal from Deimos UK / University of Strathclyde to further investigate the solar measurements which might contribute to improved orbital prediction in the future. [*Emma Kerr (Deimos UK) / Malcolm MacDonald (University of Strathclyde)*]

**11:00-12:00** A “user perspective” on solar monitoring and procedures [*Ewan Haggarty (Airbus)*]

**12:00-13:00** The SWIMMR programme [*Simon Machin / Mark Gibbs (UK Met Office)*]

**13:00-13:30** Break

**13:30-14:30** Radar research presentation [*Massimiliano Vasile / Matteo Manzi (University of Strathclyde)*]

**14:30-15:00** Closing discussion [All]
